Technical Skills

HTML5, CSS, JavaScript, Node.js, Express.js, React.js, MongoDB

Brief Summary

Proficient in building full-stack web applications using MongoDB, Express, React, and Node.js. Experienced in creating dynamic RESTful APIs, managing databases, and building responsive user interfaces. Strong understanding of front-end and back-end integration, state management in React, and server-side logic using Node.js and Express. Familiar with deploying applications and managing databases in Git and GitHub.

Education

School of Engineering and Technology — **CGPA: 7.59 / 10**
B.Tech. in Computer Engineering — *2021 – 2025*

Don Bosco — **MSBSHSE**
12th Grade, Percentage: 72.50% — *2021*

Internships

Elite Software
Web Development Intern — *Jul 2023 – Sep 2023*

- Gained a strong understanding of basics, including data types, loops, and functions.
- Worked on beginner-level projects to apply core concepts in practical scenarios.
- Assisted in writing simple scripts for data processing and automation tasks.
- Developed problem-solving skills using fundamentals in real-world applications.

Projects

Airbnb Clone | LINK

- Developed a full-stack Airbnb clone using Node.js, Express, MongoDB, and EJS for templating.
- Implemented user authentication, allowing users to sign up, log in, and manage bookings.
- Built features for listing properties, managing reservations, and CRUD operations for both users and hosts.
- Integrated error handling and input validation to ensure smooth user experience and security.
- Used Bootstrap and custom CSS for responsive, user-friendly design.

Weather App Using React.js | LINK

- Created a weather web app using React.js, Bootstrap, and an external weather API.
- Displayed weather conditions like temperature, humidity, and forecast based on user input.
- Handled errors for invalid city names and API failures.

Spotify Clone | LINK

- Developed a static Spotify clone using HTML and CSS for the frontend design.
- Recreated the interface, including homepage layout, navigation, and music player controls.
- Used responsive design techniques for compatibility across devices.

Certifications

Full Stack Web Development:
- Gained hands-on experience with MongoDB, Express, React, and Node.js to build full-stack web applications.
- Learned to create RESTful APIs, manage databases, and build responsive front-end interfaces.
- Developed and deployed dynamic web applications using the complete MERN stack.
